**EURO RESSOURCES S.A.
RECORD ROSEBEL ROYALTY REVENUE FOR 4TH QUARTER 2007
42% INCREASE OVER 3RD QUARTER 2007**

PARIS, France, January 21, 2008: EURO Ressources S.A. (TSX: EUR; Euronext of the Bourse de Paris: EUR) reports that IAMGOLD Corporation advises that production of 83,438 ounces of gold was achieved at the Rosebel gold mine during the fourth quarter of 2007.

James H. Dunnett, Directeur-Général of EURO said: "EURO is most pleased by the level of gold production during the fourth quarter of 2007, which was at an annual rate of over 330,000 ounces. Gold production in the quarter was 13.6% higher than the production achieved in the previous quarter and is the highest rate since early 2005. Further increases in production are anticipated in line with IAMGOLD's forecast and plant expansion. The Rosebel royalty recorded by EURO for the fourth quarter is \$3,846,576, a 42% increase from the third quarter royalty amount of \$2,705,949".

EURO has previously given notice to IAMGOLD for an audit of the mine production results for the third quarter 2007. These results showed gold production from hard rock increased to over 25% of the total in July and August, a much higher proportion than in prior periods. The fourth quarter production results show a further increase to nearly 30% in gold production attributed to hard rock. EURO will await the results of the current audit before determining whether a further audit may be appropriate.

In calculating the Rosebel Royalty due for Q3 2007, IAMGOLD deducted from attributed gold production, certain monetary payments made by Rosebel to the Suriname Government. IAMGOLD made a further deduction arising from a retroactive and corresponding revision to attributable production previously used to determine the royalty payable under the Participation agreement from commencement of mine production in early 2004.

IAMGOLD has made a similar deduction from attributable gold production for Q4 2007, resulting in withholding of \$108,707, conforming with the disputed approach made in Q3. EURO has objected to IAMGOLD's actions and is proceeding to arbitration on this matter: a resolution is anticipated during the current calendar quarter.

About EURO

EURO is a French company, focused on owning royalties and similar interests on operating gold mines. EURO also holds certain gold mineral rights in French Guiana including Paul Isnard which comprises 8 concessions and a PER over 140 sq. km.

EURO has approximately 60.6 million shares outstanding.
